

REMARKS

This submission contains only corrected Remarks, as is permitted by 37 C.F.R. 1.121(h), originally objected to in the May 10, 2006 Office Action.

The Examiner notes that the prior communication from Applicants does not address the non-enablement rejection made in the latest office action. Applicants apologize for this inadvertent omission and offer the following as a full reply. The rejection is premised on the contention that "a chain list in itself is not executable." Office Action at page 3. Applicants respectfully dispute this contention, and as proof offer United States Patent No. 5,249,265, which in its abstract states it is directed to a "chained list of execute structures." Since chained lists can in fact be executed, the basis for the rejection has been refuted.

It is respectfully submitted that the subject matter of the present application is new, non-obvious, and useful. Prompt consideration and allowance of the application are respectfully requested

Respectfully submitted,

KENYON & KENYON LLP
